What flowers do I see? (if you know the name include it, if not that's okay.) Draw and describe the flowers you are watching today.

# My Pollinator Journal

Who visited the flower? Draw and describe who visited the flowers. It helps to take a video in slow motion to see them much more clearly. Bees, flies, butterflies and even birds can visit flowers.

Name: \_\_\_\_\_

This is me as a scientist! (in the space above draw yourself as a scientist)

This journal will track your observations. Observation is the process of looking really carefully at something to gain more information. Pay attention to colors and shapes, how something smells, how it feels (if it's safe to touch) and how things move.
