

## Superhero Cape

Every superhero needs a cape. There are lots of different styles and designs out there for making a child's cape. These directions are a simple no sew option so feel free to change it up depending on what you have on hand. When finished it should fall about as low as their knees and be ready for lots of adventure and fun.

### Materials

- old sheets or large t-shirts
- markers

Step 1- Lay sheet flat and cut a triangular shape large enough to hang from your child's shoulders to knees. At the top include strips to use to tie the cape on. If using a t-shirt keep the neck intact and cut off the sleeves and front leaving the back section only. (see diagram below)

Step 2- Decorate your cape with images of how you are taking steps to be an Earth Superhero.

Time to wear your cape proudly and go on an adventure!
